CyberQ group

CyberQ Group: SOC as a Service

For most organisations, security is a timeconsuming and expensive necessity, distracting from the core business mission. Developing comprehensive in-house IT security poses a challenging and expensive proposition.

CyberQ brings expert capabilities, experience and technical knowledge delivered as an outsourced 24/7/365 Managed Security Service Provider (MSSP) for businesses of all sizes.

Why SOCs and Why Now

With an XDR-enabled security operations centre (SOC), you can achieve proactive security and complete control of your business data. Our expert cybersecurity team provides continuous monitoring, detailed assessment, and effective defence of your systems while your data remains within your business environment. It also helps you realise significant operational, financial, and compliance improvements.

Common organisational concerns:

- Threats not responded to in a timely, consistent manner.
- Lack of coordinated operational and technical approach to prevention, detection and remediation
- Sourcing the appropriate skills to defend against and respond to security attacks.
- Lacking accurate incident and threat status.

CyberQ SOC as a Service

CyberQ SOC as a Service delivers efficient, comprehensive security coverage by leveraging XDR. We provide 24/7/365 Network and EDR monitoring and response, precise threat detection, and swift response, enhancing the effectiveness of your current security tools.

Why **outsource?**

Technology alone cannot solve all security problems. Case after case illustrate human actors as both the weakest link and most important component of a holistic security framework. The outsourced partnership model delivers a number of key operational benefits, including:

Access
Security expertise, research and threat intelligence

Improve
Threat detection & response time capabilities

Monitor
Cyber security alerts and reporting protocol

Save
CapEx and OpEx by outsourcing critical security functions

Benefit
From established and proven policies and procedures to enhance organisational security maturity

SOC as Service **Options**

Outsourced

Unlock the full potential of XDR with CyberQ's dedicated Security Operations Centres (SOCs). Our highly skilled team of cybersecurity professionals provides round-the-clock, 24/7/365 monitoring, in-depth threat assessment, and rapid incident response. We proactively hunt for and neutralise threats, ensuring comprehensive protection and delivering all the benefits of a fully managed SOC/MSSP without building and maintaining your own infrastructure.

In-House

Designed for SMEs and Enterprise clients, requiring their own in-house SOC functions. CyberQ provides a customised programme of consultancy services to assist in all/some of the adjacent broad stages of SOC development.

Get In Touch

If you are interested in leveraging and enhancing your existing security team and infrastructure, contact CyberQ for a no-obligation assessment.
We will review your existing set-up, discuss the options for outsourcing vs in-house and propose potential areas of partnership.
