

# MANAGED SECURITY OPERATIONS CENTRE

## Global Intelligence-led SOC to Make Your Business Cyber Resilient

In the era of rapid growth of new technology, the threat of cyber attacks is at an all-time high, leaving all organisations open to the risk of financial losses, intellectual property theft and reputational damage.

Gain a competitive advantage and stay one step ahead of evolving cyber threats with CyberQ Group's fully managed global intelligence-led Security Operations Centre (SOC).

Our proactive, global intelligence-led approach allows us to anticipate and prioritise active and emerging threats to your business to reduce the attack surface and adapt defences.

By using the latest cutting-edge technologies and cyber threat intelligence our security professionals ensure your business remains operational.

### Managed SOC

CyberQ Group's in-house SOC offers a fully managed solution that proactively monitors external and internal threats, provides rapid response to incidents, protects both digital and physical assets and assists with meeting sector-based security compliance.

#### 24/7 Protection

With our global 'follow-the-sun' team of cyber professionals, we proactively protect, detect and remediate risks.

#### Data Security & Compliance

Enhance the security of your critical assets and meet regulatory requirements with 24/7 monitoring, vulnerability management and incident response.

#### Solid ROI

Our intelligence-led SOC is the first line of defence, growing revenue by increasing stakeholder trust, maintaining business' reputation, and increasing and retaining customers.

#### Better Threat Management

Get instant access to the latest advancements of a centralised global intelligence-led SOC that is designed to detect and mitigate threats before they have an impact.

## Build versus Partnership

- CyberQ Group's SOC combines people, process and technology to provide actionable security intelligence without the cost, complexity and workforce required when building an in-house SOC.
- We work as an extension of your existing team to provide a 'follow the sun' service.
- Take advantage of our robust onboarding process that gets the SOC up and running within 48 hours.
- Get immediate access to our investment in skilled cyber professionals to manage your security effectively.
- Avoid the overall capital and operational costs required to set up and run an in-house SOC.
- Utilise our 150 years' combined industry experience of working collaboratively with multi-sector organisations.
- We focus on your security so you can focus on growing your business.

## How it Works

The CyberQ Group managed SOC brings together the people, process and technology to continually protect both digital data and physical assets, by routinely monitoring and analysing your

organisation's security posture.

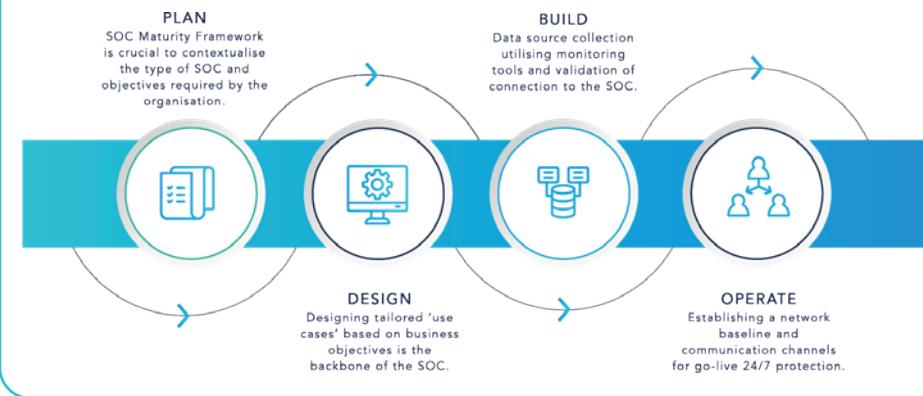

- Monitor activities on both cloud and on-prem infrastructure including databases, servers, websites, endpoints, and web applications for potential risks.
- By feeding into our extensive pool of threat intelligence feeds, our global team of cyber professionals stay on top of the latest external and internal threats.
- Our extensive framework of detection, analysis and playbook of

responses allows us to respond in real-time to cyber attacks.

- Utilise our established set of sector tailored techniques such as compliance compatible, threat detection and dark web intelligence to improve cyber maturity of an organisation.
- A holistic infrastructure view, combined with our mature enrichment feeds, provides organisations with insights into the latest cyber threats and remediation techniques.

### The Onboarding Process

We work closely with you to gain an in-depth understanding of how your business operates, so we can design and build a SOC to adhere to your specific business requirements.

## About CyberQ Group

Established in 2016, CyberQ Group's international team of cyber experts and business professionals have decades of combined experience within the cyber and technology sectors.

We believe even the most daunting challenges can be overcome through collaboration, innovative technology and great people.

We bring together the best of all these components, keeping your business better protected.

The result? Improved business risk profile, significant operational cost savings and long-term peace of mind.

Get in touch today to find out how we can keep your business secure.
